Salmon Diagonal Slicing Machine

Salmon diagonal slicer — specifications and processing

280 Model Salmon Diagonal Slicing Machine — Production Line

Equipment adaptation: 280 model salmon diagonal slicing machine, adapted capacity 250–350 kg/h, mainly producing sashimi salmon slices and smoked salmon slices; complete line supporting equipment: fish filleting and deboning machine, washing machine, dewatering conveyor, 280 model salmon diagonal slicing machine, picking conveyor, vacuum packaging machine. No other stirring-type equipment is required.

Process Flow

1. 1. Raw-material pretreatment: the salmon is thawed and trimmed to remove fish bones, fish skin and impurities, obtaining clean fish meat, stored at a controlled low temperature of 0–4 ℃ to avoid spoilage.
2. 2. The clean fish meat is sent to the washing machine for washing, the surface water is drained through the dewatering conveyor, and it is conveyed to the feed inlet of the 280 model salmon diagonal slicing machine.
3. 3. 280 model salmon diagonal slicing machine process step: completes the diagonal cutting of the fish meat; the diagonal cutting angle is adjustable and the slice thickness can be set as required; it continuously produces salmon diagonal slices of uniform thickness, reducing scrap loss and ensuring the slices are complete and not broken.
4. 4. The cut fish slices fall onto the picking conveyor, and are manually sorted to remove fragments and defective slices.
5. 5. Qualified fish slices are arranged on trays and conveyed to the vacuum packaging machine for sealing and packaging.
6. 6. After packaging, metal detection and labeling are carried out, and the finished product is put into cold storage.

Salmon Diagonal Slicing Machine

It is suitable for the diagonal cutting of various aquatic products such as salmon, tuna, sole and basa fish; it can automatically cut uniform-thickness diagonal fish slices, with complete slices and no broken meat. It is suitable for processing sashimi, hotpot fish slices and prepared seafood dishes; used together with

washing and packaging equipment, dedicated to seafood processing plants and Japanese-food ingredient workshops.

Product Attributes

Item	Value
Brand	Henco
Product alias	Fish slicing machine
Main downstream platforms	wish, alibaba, Amazon, independent website, AliExpress, LAZADA, eBay
Main sales regions	Southeast Asia, Northeast Asia, Latin America, Africa, Europe, Middle East, China, South America, North America
After-sales service	Nationwide joint warranty, lifetime maintenance
Type	Fish meat collector

Packaging Information — Item Weight

Item	Weight (g)
Item weight	240000

Salmon Diagonal Slicing Machine (Alternative Data Sheet)

It is suitable for the diagonal cutting of various aquatic products such as salmon, tuna, sole and basa fish; it can automatically cut uniform-thickness diagonal fish slices, with complete slices and no broken meat. It is suitable for processing sashimi, hotpot fish slices and prepared seafood dishes; used together with washing and packaging equipment, dedicated to seafood processing plants and Japanese-food ingredient workshops.
